Correct DS 13 mal:

Ex4:

schéma:

(AM = x)

.Ex3:

b)
$$(2x+1)(3x-5)=0$$
 - produit factor mul c) $x^2=36$

$$c) x^2 = 36$$

$$c > 2x + 1 = 0$$
 and $3x - 5 = 0$

$$= \times = \pm \sqrt{36} = \pm 6$$
 au $\times^2 = 36 = 0$

$$e_0 \times = -\frac{1}{2}$$
 on $x = \frac{5}{3}$

. Exercice 5:

$$31/2x^2 - 10x - 5 = 7x - 5$$

Fourthe Exercices:

.Agrandissement - Reduco:

$$\Leftrightarrow V_{ch} = \frac{729 - 216}{3} = 171 \, \text{m}^3$$

a) whe
